# RAW CIVIL CONSTRUCTION

RCC's structure provides South Australia over 50 years of Civil and Construction experience across Federal, State and Local projects.

The team's proven delivery within tier 1 and 2 project governance has been the basis in which RCC has provided its self performing outcomes to date.

Dedicated project managers, together with proven operational field supervisors, has provided RCC the opportunities to grow Aboriginal civil and construction supervisors, leading hands, skilled labours and expand its labour force to include 5 civil apprentices.

RCC's physical and cultural safety-first approach enhances our peoples' opportunities to grow in an environment that replicates care, compassion and empathy, whilst upholding corporate governance, direction and values.

## THE VISION.

Provide secure long-term economic independence for Aboriginal people and their communities.

## OUR GOAL.

- Provide effective and culturally aware employment and training within the construction industry
- Excel in customer service and project delivery
- Establish RAWsa as an employer of choice within Australia's construction industry
- Be respected within Aboriginal communities, as a known industry leader in the delivery of quality employment and training opportunities

## OUR COMMITMENT.

- Provide a work environment which is culturally appropriate
- Respect the culture and values of Aboriginal people
- Ensure confidentiality when requested
- Be transparent and open in all decision-making with our partners, clients, staff and the broader community
- Maximise the use of local Aboriginal goods and services
- Provide quality leadership and direction in training and daily activities
- Promote a fair, safe and successful workplace

## OUR SERVICES.

**Bulk Earthworks:** Bulk excavations, road embankment construction, retention and drainage basins, stop and levy banks.

**Detailed Earthworks:** Batters, swale construction, building pads, abutment fills, rock pitching and protection.

**Concrete Works:** Concrete pavements, building slabs, footpaths, retaining walls and stairs.

**Stormwater:** Concrete pits, box culvert, pipe installation and PVC installs.
